Revisions for Manual of Operations, Part 2, Version 15.2
April 13, 2011

Modification of note for Item 22b (Nasal CPAP before ETT Ventilation):

The note for Item 22b was modified for clarification. Please attach the following note to Part 2 of the 2011 Manual of Operations on page 16.

NOTE: Intermittent positive pressure breaths refers to assisted breaths given through an endotracheal tube using a mechanical ventilator or given through an endotracheal tube using a resuscitation bag.
